TRAINING

# Human Factors in the Chemical and Process Industries

## Modular human factors training

Would you like to develop your understanding of human factors in the chemical process industries?

Are you looking for practical guidance, tools and approaches to help you manage human factors effectively at your organisation?

Sign up for our human factors training and take your human factors understanding to the next level.

Training is available online and face-to-face in Manchester, UK. It can also be delivered in-company.

### What's available?

Module One	Module Two	Module Three	Module Four
Managing Human Factors	Managing Human Failure	Strengthening Organisational Performance	Human Factors in Design

Complete individual modules or all four depending on your training needs. Visit our website to see scheduled online and in-person dates. Spaces are limited – early booking is advised.

“Human Factors in the Chemical and Process Industries has given me the confidence to lead the human factors agenda at a top tier COMAH site.”

Ian Taylor, SABIC UK Petrochemicals
