

Molecule2Market™

Work Experience Week: 13th - 16th July 2026

Join the 2M Group of Companies for an exciting four-day work experience programme designed for students aged 15 and above, including those preparing to head off to university!

If your child or a student from one of our suppliers, customers, or wider professional network within our industry and interested, they are very welcome to apply.

Throughout the week, students will explore a dynamic programme that goes beyond science, with sessions covering Finance, Sustainability, Logistics, Marketing and hands-on experiments.

Participants will also have the opportunity to meet members of our business team and take part in social activities in the evenings.

Molecule2Market™ gives students a chance to see how businesses work and learn about different jobs.

This helps the students to build important skills such as teamwork, communication, and problem-solving, whilst also boosting their confidence.

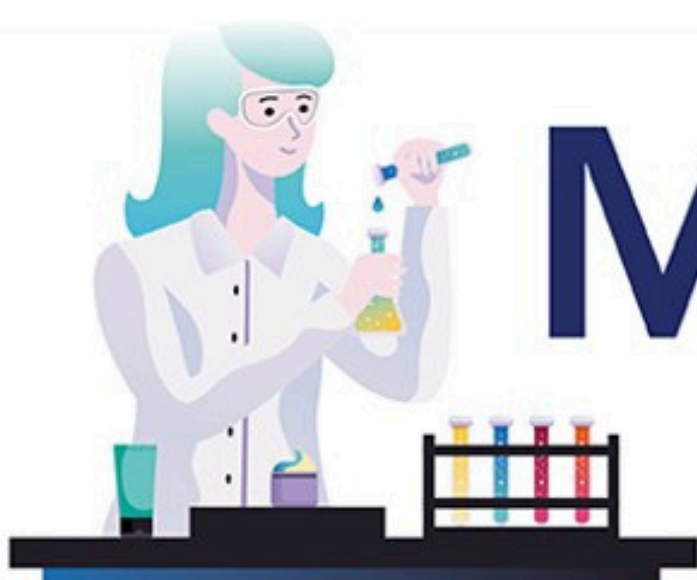

With the sessions being led by professionals, as well as taking part in hands-on tasks, gives students valuable experience and connections, while working in an office environment helps them understand what it's like to work in a professional setting and prepares them for future studies.

Molecule2Market™ is more than just a work experience programme, it's part of 2M's commitment to making careers in science accessible and inspiring for the next generation.

Please contact stem@2m-holdings.com to enquire.

To secure a place, please complete and return the attached application form.

We look forward to an inspiring and memorable week together. With special thanks to our 2M STEM Ambassadors for making this programme possible.
